Professional Summary

Motivated fourth-year B.Tech Computer Science student with a strong foundation in C#, ASP.NET Core, .NET Framework, SQL Server, and Object-Oriented Programming (OOP). Hands-on experience in developing web applications using ASP.NET Core MVC, Entity Framework Core, RESTful APIs, and SQL Server through academic and personal projects. Familiar with software development lifecycle (SDLC), database design, debugging, version control using Git, and Agile development practices. Passionate about building scalable, high-quality software solutions and continuously learning modern .NET and AI technologies.

Experience

.NET Developer Intern — A2R Software Solutions Jun 2025 – Jun 2026

- Developed and maintained web application modules using C#, ASP.NET, and the .NET Framework while following object-oriented programming (OOP) principles and coding best practices.
- Worked with SQL Server to design, write, and optimize SQL queries, stored procedures, and database operations for efficient data management.
- Collaborated with the development team to debug, test, and enhance application features, ensuring functionality, performance, and code quality.
- Participated in the complete software development lifecycle (SDLC), including requirement analysis, implementation, testing, version control with Git, and deployment support.

Technical Skills

Programming Languages: C#, C, SQL, JavaScript, HTML5, CSS3

.NET Technologies: .NET Framework, .NET Core, ASP.NET MVC, ASP.NET Core, ASP.NET Web API, ADO.NET, Entity Framework Core

Frontend: HTML5, CSS3, Bootstrap, JavaScript, Razor Pages

Databases: SQL Server, MySQL, T-SQL, Stored Procedures, Views, Joins, Indexing, Database Design

Development Concepts: Object-Oriented Programming (OOP), Data Structures, Design Patterns, RESTful APIs, Authentication & Authorization, CRUD Operations, Exception Handling

Tools & Platforms: Visual Studio, VS Code, Git, GitHub, Postman, SQL Server Management Studio (SSMS), IIS

AI & Emerging Technologies: Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), AI Agents, Prompt Engineering, GitHub Copilot

Soft Skills: Problem Solving, Debugging, Analytical Thinking, Team Collaboration, Communication, Agile Development

Projects

Employee Management System — ASP.NET Core MVC, C#, Entity Framework Core, SQL Server

- Developed a CRUD-based Employee Management System using ASP.NET Core MVC and Entity Framework Core to manage employee records efficiently.
- Implemented features such as employee registration, update, delete, search, and validation with a responsive Bootstrap-based user interface.
- Connected the application to SQL Server using Entity Framework Core for database operations and performed data validation and exception handling.

Online Banking Management System — ASP.NET Core MVC, C#, SQL Server, Entity Framework Core

- Built a web-based banking application that allows users to create accounts, deposit funds, withdraw money, transfer funds, and view transaction history.
- Implemented secure user authentication, role-based authorization, account management, and transaction processing using ASP.NET Core Identity and Entity Framework Core.
- Designed a SQL Server database with relational tables and developed RESTful architecture with proper validation, exception handling, and responsive UI using Bootstrap.

Education

Vignan Institute of Technology and Management(VITAM)

B.Tech in Computer Science & Engineering

Mahurikalua Science College, Balipada

Higher Secondary Education

2022 – 2027

Berhampur, Odisha

2020

Ganjam, Odisha
